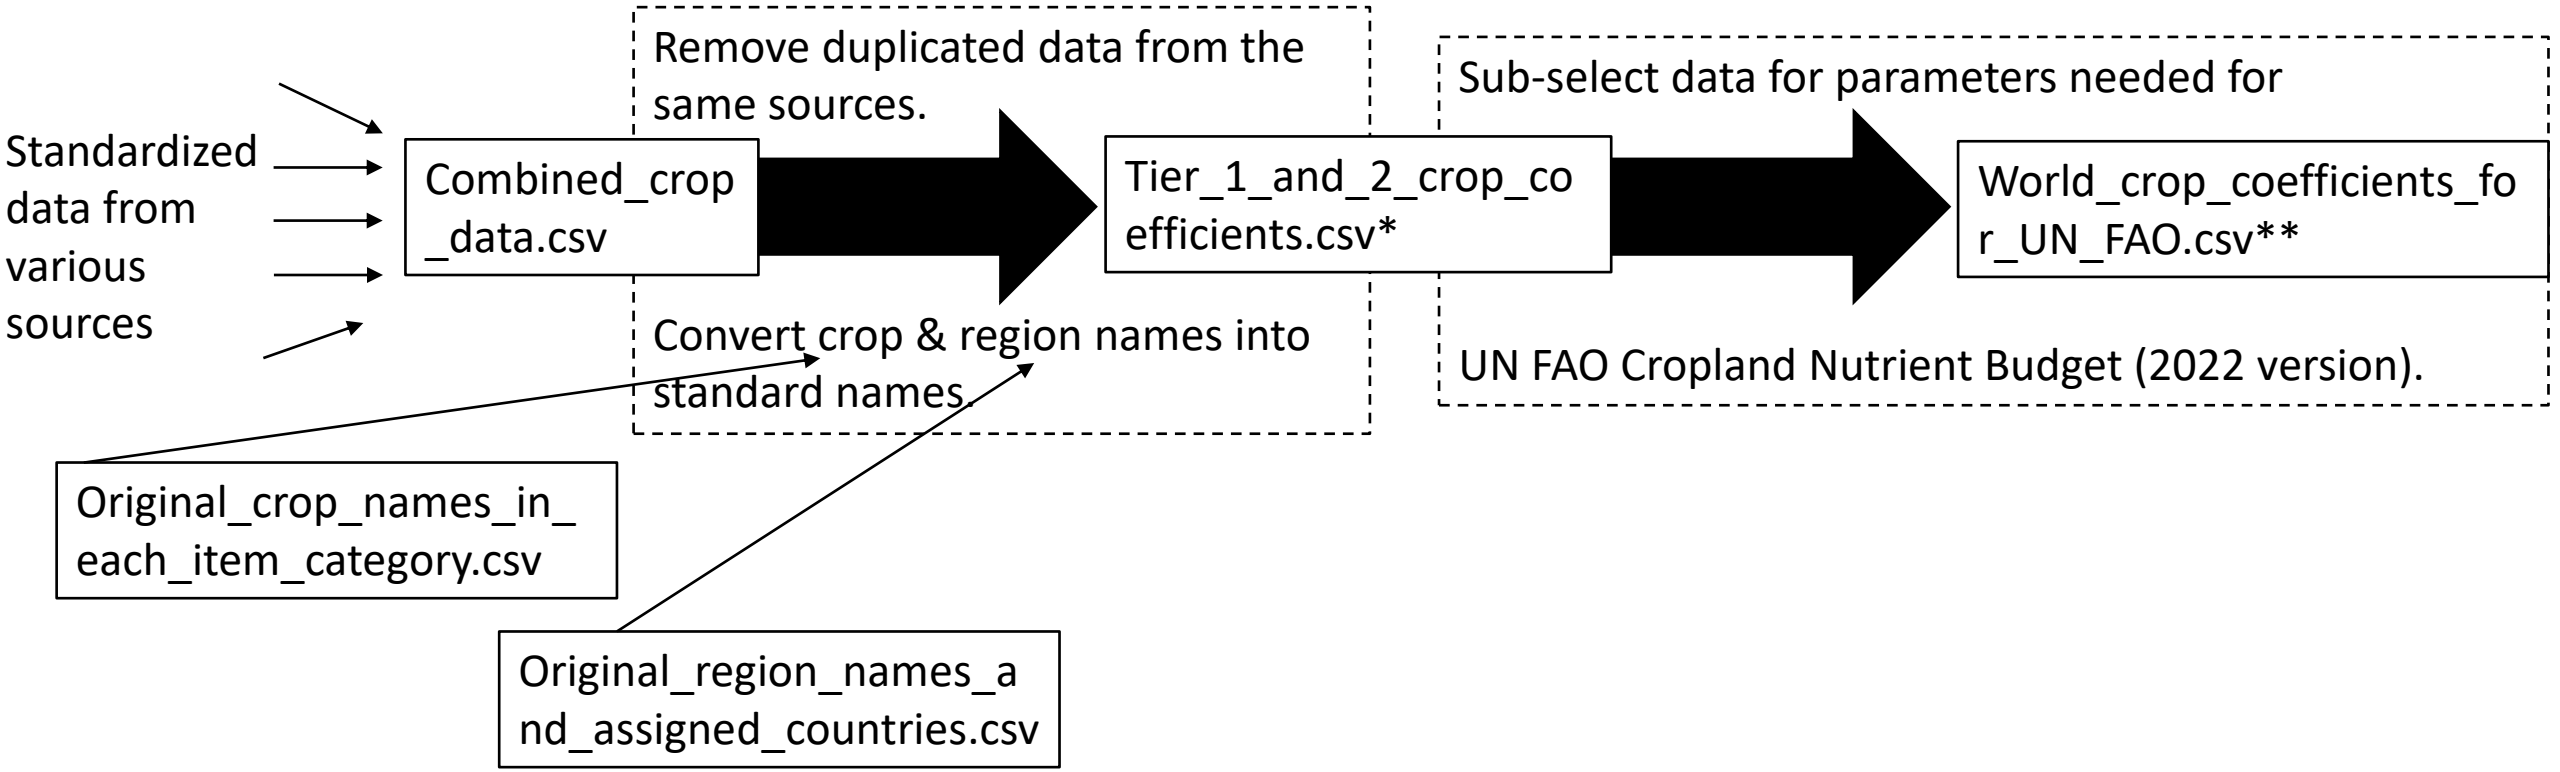
Diagram for data files in: global crop nutrient concentration and harvest indices DRYAD dataset.



Processing performed using R Studio with raw data and scripts available at: https://github.com/ludemannc/Tier_1_2_crop_coefficients.git
*this file includes crop coefficients that represent the 'world' (Tier 1) or that represent regions of the world (Tier 2). Tier 2 coefficients are allocated to UN recognised countries for ease of comparisons.
**this file includes Tier 1 data for crop product nitrogen, phosphorus and potassium nutrient concentrations for crops that had data available.
